

Dear FCC,I support XM radio. I feel that by listening to XM I am: 1. Exercising my freedom of choice not to be bombarded by commercials and the same 10 songs over and over again. 2. Helping to rid the world of road rage. 3. Adding to my education via the classical station. 4. Enjoying more than ever before listening to the radio and reading books, rather than staring at mindless television.

XM is innovative, user friendly, and provides a wide variety of high quality programming. Please let XM do what they do best...continue to be the best thing that's ever happened to radio. I respectfully request you reject the NAB petition 04-160. I request that you not make changes to the traffic and weather offerings on XM, as well.

Thank you,

Mary Tilly
